

Kriss Akabusi presents 'Make it Happen'

Friday 25th March 2011

Kriss Akabusi can be summed up in a single word, inspirational.

Kriss is famous for his achievements in athletics where his greatest individual triumph was his Gold Medal in the 1990 European Championships when he also beat David Hemery's 22 year old British Record.

Kriss is currently the CEO of the Akabusi Company, a corporate communications and training company where his marvellous personality and reputation as a fantastic public speaker has made him a very popular and attractive advocate.

I'm Kriss Akabusi and I have personally gathered together a team for our second 'Make it Happen' on Friday 25th March 2011 in our event designed to capture the Olympic Spirit! Thus ensuring that we'll have passion, pride and a can-do attitude within our arenas and be the chief executive officers of our own careers, bringing energy and enthusiasm to our teams and the people we work with. Following the success of 'Make it Happen' in September 2009, where the focal point of the event was to be part of the solution to the economic down turn, to lead in a period of darkness.

Make it Happen 2011 will provide the opportunity for like minded people to meet subject matter experts in individual and team motivation, sales, marketing/branding, finance, futurology, recruitment and team building.

Who are those like minded people?

- SMT's (Senior Management Teams) for effective strategic planning
- Business owners for excellent networking opportunities
- Managers who will learn how to inspire and grow their team
- Sales people who want additional insight to their customers and market place
- Team members to understand the importance of their role in overall team performance

What does the day include?

The morning will be uplifting and energising with a series of keynotes while the afternoon provides the opportunity to break into focus groups in what we call 'meet the pros sessions' where delegates get the opportunity to interact with track leaders as part of the alchemy of the event. Believing the Aristotelian adage 'the sum of the parts is greater than the whole'
